

This is the stage where only a few countries were left to trace in flash , images imported ,alphas assigned, buttons and mask assigned with all the tantrum of the action script ;) and ready to use.

Closer look and trying to change the image of sowiet Union..below coming up are all the earlier stages in which I was tracing continent after continent and its countries one after the other.Each on a separate layer obviously .You will see a coloured outline with a coloured fill .Each colour fiffernt from each other so I can distinguish it afterwards when I assign symbols to it.
